Supervisor: Matei Zaharia
Integrated Scala Pickling, our framework for fast, boilerplate-free, extensible serialization focused on distributed programming (OOPSLA'13) into Spark. Developed new function-passing programming model and framework, can be thought of as a generalization of Spark/MapReduce programming model.

EPFL Undergraduate course on parallel, distributed, and asynchronous programming (~90 students)

Lecturer, Co-Designer, *Parallel Programming & Data Analysis* — *2015*
Upcoming Coursera MOOC on parallel, distributed, and asynchronous programming.

Lead, *Functional Programming Principles in Scala* — *2012 – 2014*
Popular Coursera MOOC on functional programming in Scala, with >200,000 participants to date & largest completion rate for a course its size (~19%)

- Lead teaching staff organizing a team of graduate students, managing content production, designed course exercises with cloud-hosted grading, production of lecture videos, etc
- Created extensive course analysis with interactive visualizations; led to a publication at ICSE'14

(Lead) Teaching Assistant, *Programming Principles* — *2011-2014*
Required EPFL undergraduate course on functional and logic programming (~160 students)

Instructor, *Scala as a Research Tool* *2013*
ECOOP Tutorial

Research Interests

Concurrent, distributed, data-centric, and data-intensive (big data) programming, from the perspective of programming languages. I work on both theoretical ideas & implementations for the Scala programming language which seek to make it easier to build distributed systems.
